Butterfly minds

Factory model of education

Agricultural model of education

We have to recognize that human flourishing is not a mechanical process—it's an organic process. And you cannot predict the outcome of human development. All you can do, like a farmer, is create the conditions under which they will begin to flourish.

Ken Robinson, educationalist

Managers who measure and instruct

Under systematic management, the best man rises to the top more certainly and more rapidly than ever before.

Frederick Taylor, management theorist

Leaders who foster autonomous learning

Organisations learn only through individuals who learn.

Peter Senge

Self-Determination Theory

Competence

Relatedness

Autonomy

How do we grow butterflies?

Humans are hard-wired for learning

“ What kills learning pleasure are those who try to divide, organise or control it. ”

John Holt

**“ Lessons come from people, not as a blueprint,
but as a possibility. ”**

Tumi Mogorosi, jazz musician

**“ Lessons come from people, not as a blueprint,
but as a possibility. ”**

▪ **Awareness development**

Tumi Mogorosi, jazz musician

“ **Horizontal learning is essentially technical training: a transfer of content—information, techniques—in focused areas.**

The counterpart of horizontal learning is vertical development, which highlights awareness development. ”

Dorothy Siminovitch, coach

Vertical development

Continuous Improvement

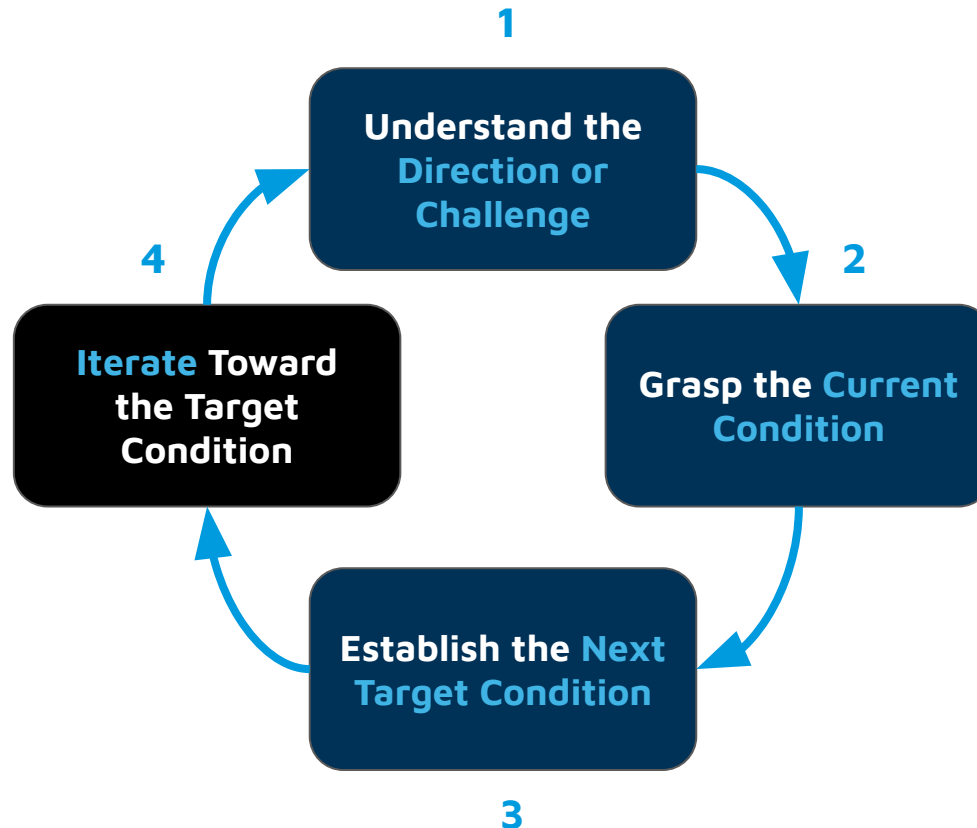

Create Flow

How will I maintain progress?

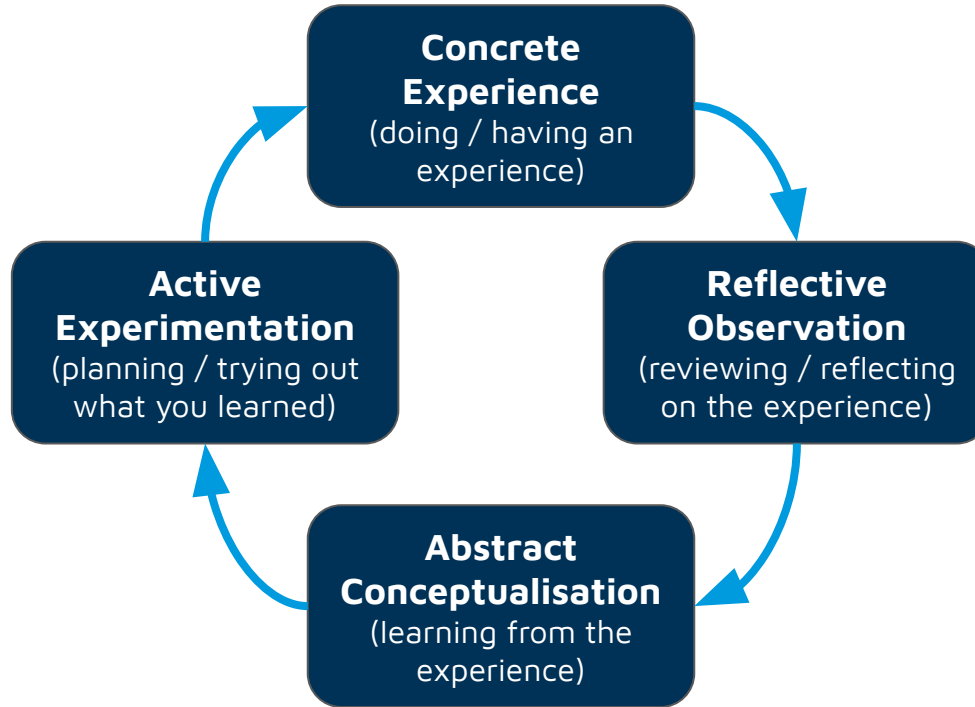

Establish Pull

Where can I apply this in my work?

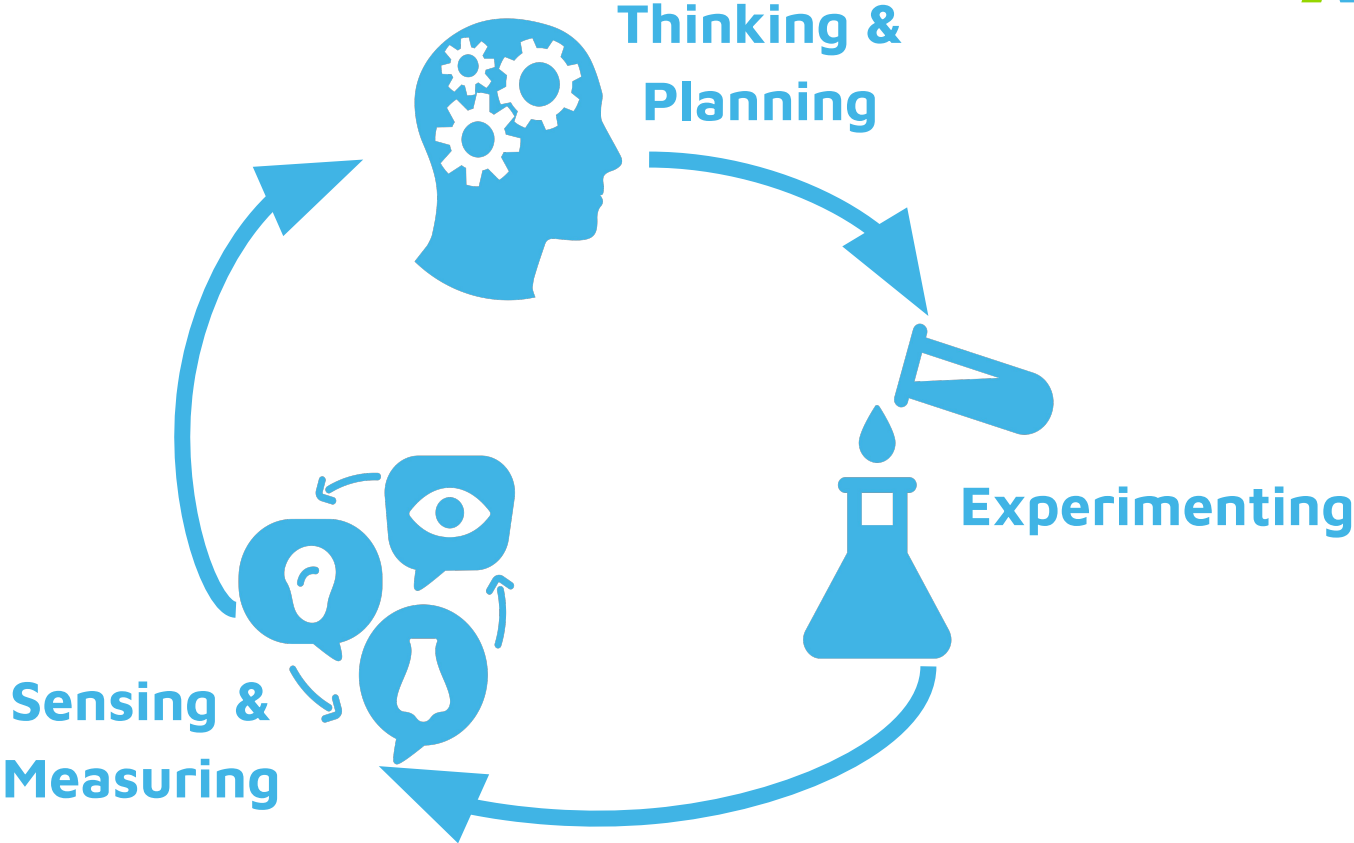

Toyota improvement kata

Kolb's experiential learning cycle

Learning as a lean process

Optimising for learning flow

Coaching

Raising awareness and personal responsibility to unlock potential. Emphasises goals, not standards.

Reflective learning

Think critically about how your knowledge, skills and understanding are developed through your experiences.

Feedback

Give each other feedback which focuses on future development and growth. "Feed-forward"

Community

Come together as a community, to learn and collaborate toward shared goals.

1. Learning backlog

| Goals ("I want to learn...") | Actions ("I will learn by...") | Measurements ("I'll know I'm successful when...") | Deadlines ("I'll do it by...") |
|--|--|--|---------------------------------|
| Implement and maintain a CI/CD pipeline | Speak to another AK-er about what production on day 1 would look like | Every commit results in API end point which provides commit ID | Something reviewable by 6th May |
| How to practice TDD to a good and consistent level | Look for someone to pair with on this (e.g. Brian) | Another AK-er has reviewed my pipeline | Something demo-able by 20th May |
| Enough python to be able to do my job well. | Implement a pipeline for a small project ("production on day 1") | I feel confident that I could repeat the steps and act on the feedback | Possibly full demo 17th June |
| | Do a bit of reading on TDD (e.g. TaaP resources) | When it becomes second nature to write a test before solving the problem in code | |
| | Use TDD to design a small python project | Another AK-er has reviewed my code and given me some feedback | |
| | Work on a small python project practicing TDD consistently and deliberately | I have shared something I've learned about TDD with another person/people | |
| | Find out who's working with python on client work and get them to demo some of their codebase to me. | I feel I know how to structure my python project | |
| | Spec out a small python project | Another AK-er has reviewed my code and has indicated it is up to scratch | |
| | Work on a small python project | I have created a new guru card about python best practices | |
| | Ask the community what python features they like/find useful on client work | | |

Since Day 1, I was introduced to the idea of working through a learning plan - and I can say it was 100% worth it...it's absolutely something to be worked on and used as part of an iterative process.

2. Pastoral management

Ronald Dadds, Consulting Engineer

I've really enjoyed having a regular meet-up with my pastoral manager. They've always listened to any areas I've expressed an interest in learning and have provided information about what my next steps could be.

I found the 1:1 really helpful...I left feeling I had a lot more clarity

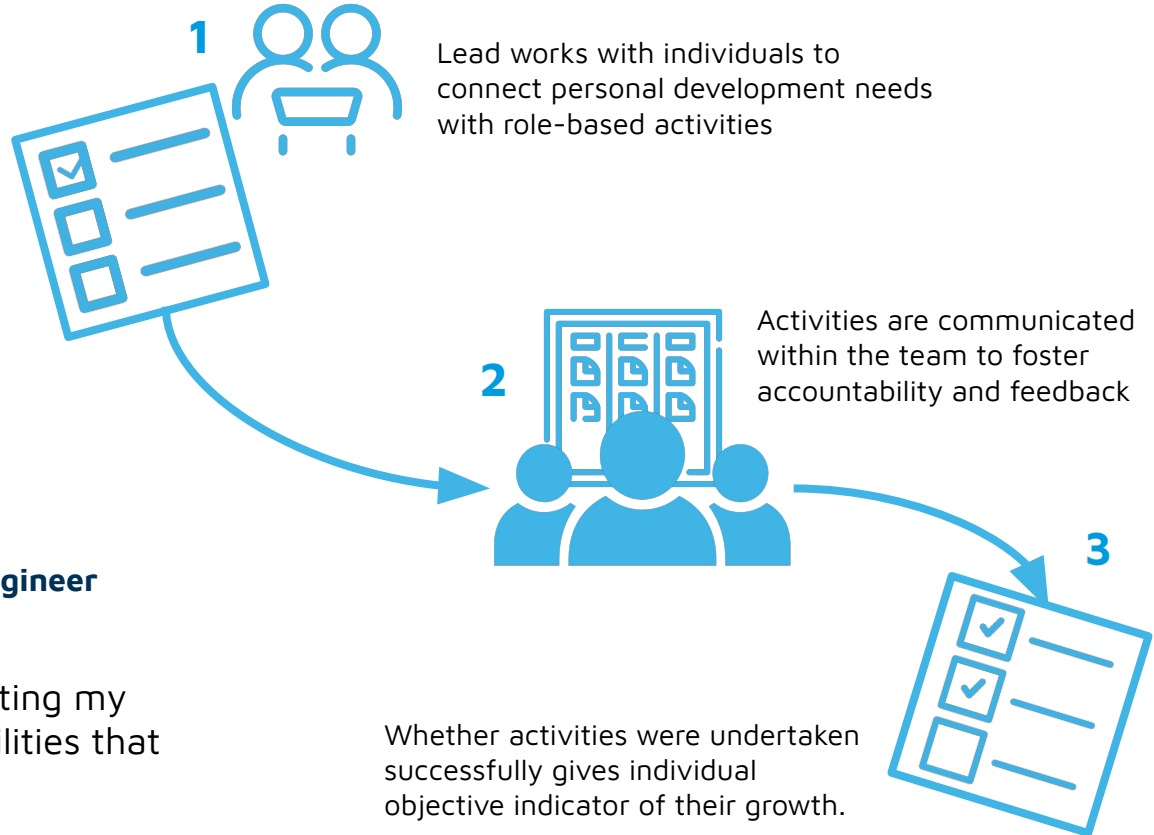

You brought to my awareness areas of learning that I hadn't even considered

3. Engagement leadership

Joe Blackman, Lead Consulting Engineer

“ I aim to do less, by supporting my team to take on responsibilities that support their growth ”

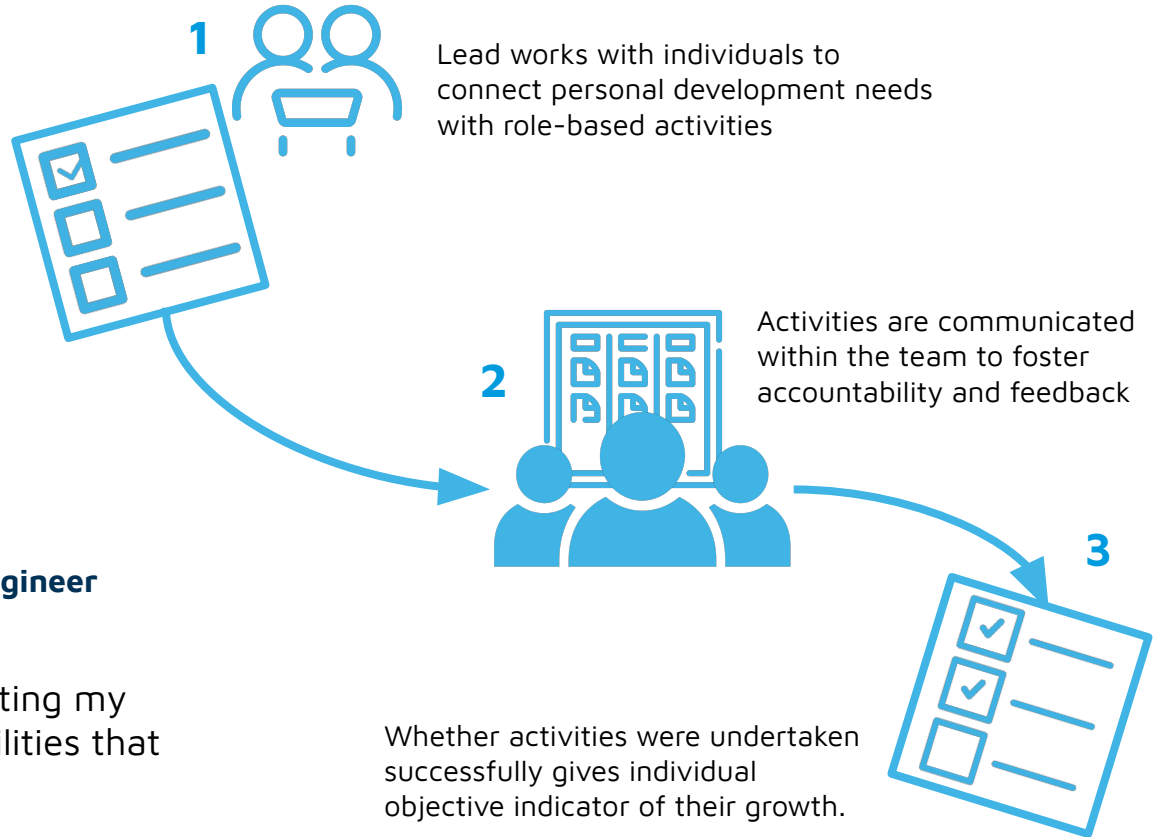

3. Engagement leadership

Joe Blackman, Lead Consulting Engineer

“ I aim to do less, by supporting my team to take on responsibilities that support their growth ”

3. Engagement leadership

Joe Blackman, Lead Consulting Engineer

1 “ Joe helped me take on additional responsibilities to support my development goals ”

2 “ I can evidence the progress I am making ”

3 “ The team provides a safe and supportive environment where I can try things out and get fast feedback ”

4. Learning days

| Name | | What outcome do I want? | Activity | Do I want to collaborate? |
|------|----------|--|---|---|
| E.g. | Tom | Understand if we and evolve some thought leadership (CHCD/Infra related) | Present ideas, determine appetites and get buy-in | Hell Yeah! 2pm |
| | Abhishek | I would like to know when we are doing an different engagements (midweek give two details) | Round table discussion | |
| | Shane | Understand, team dynamics and strategy more | Read my books | no |
| | Ben N | Practice crafting engaging talks / demos | Finish my IoT demo talk | sure thing, but it will be a very Ben-focused activity |
| | Lucy | To feel comfortable helping other people access support they may need | Spill Manager Training | It would be great to get feedback on the session afterwards |
| | Brian | WTF is ASDF tooling? | Investigate ASDF tooling | If you are an expert. A quickstart? |
| | Sam | To feel ready for team topologies training | Finish reading the book | no |
| | Victoria | Help more people do the feedback workshop! | Run the feedback workshop! | Pointless not collaborating! 11am |
| | Jake | Create a serverless API in Go | Do the thing | Negative |
| | Lauren | Learn about team topologies & get better at challenging | Finish TT course & read stuff | Probs not |

5. AK Days!

What to do?

- Use post-its to pitch ideas for sessions you would like to run or attend.
- After people have added their ideas, we will create the schedule together.
- We can add more rooms if necessary or save stuff for next month!
- Try to ensure there is a non-technical option at all times.

I would like to facilitate...

- go
- publish a Discovery Miro template (BD)

I would like to attend...

- tech reader (Br)
- guru for non-tech
- adding an architecture session to the AS (Shepherd) (BD)
- killing the way armakunt. to uk (Tom) (BD)

When do you want to do it?

| | Main | Room 2 | Room 3 |
|---|--|---|---|
| 14.10 | Session 1.1 guru for non-tech (shane) | Session 2.1 guru for non-tech (shane) (BD) | Session 3 pre-boost for Lucy (Mary) workshop |
| 14.40 | Session 1.2 tech reader (Br) | Session 2.2 guru for non-tech (shane) (BD) | |
| probably should have a break at some point. | | | |
| 15.40 | Session 1.3 | Session 2.3 | |

Peer-led organisational learning

Continuous Learning Lead

- Collaborates with Delivery to identify organisational learning needs
- Defines loose themes for AK Days
- Communicates needs & themes to AK Day team

Individual with an idea

Seeks buy-in from team

AK Day Team

Plans & delivers AK Day

Does it work?

How to spot a culture of continuous learning

Measure it?

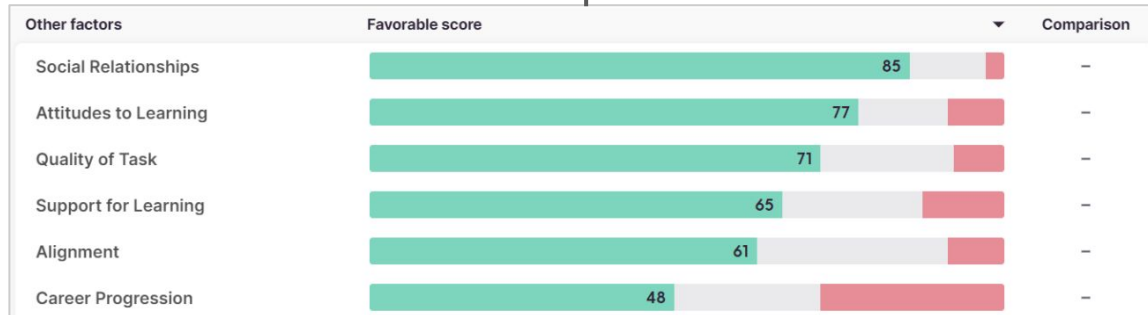

(surveys, skills assessments)

Talk to people?

(interviews, focus groups etc.)

Observe them in the field?

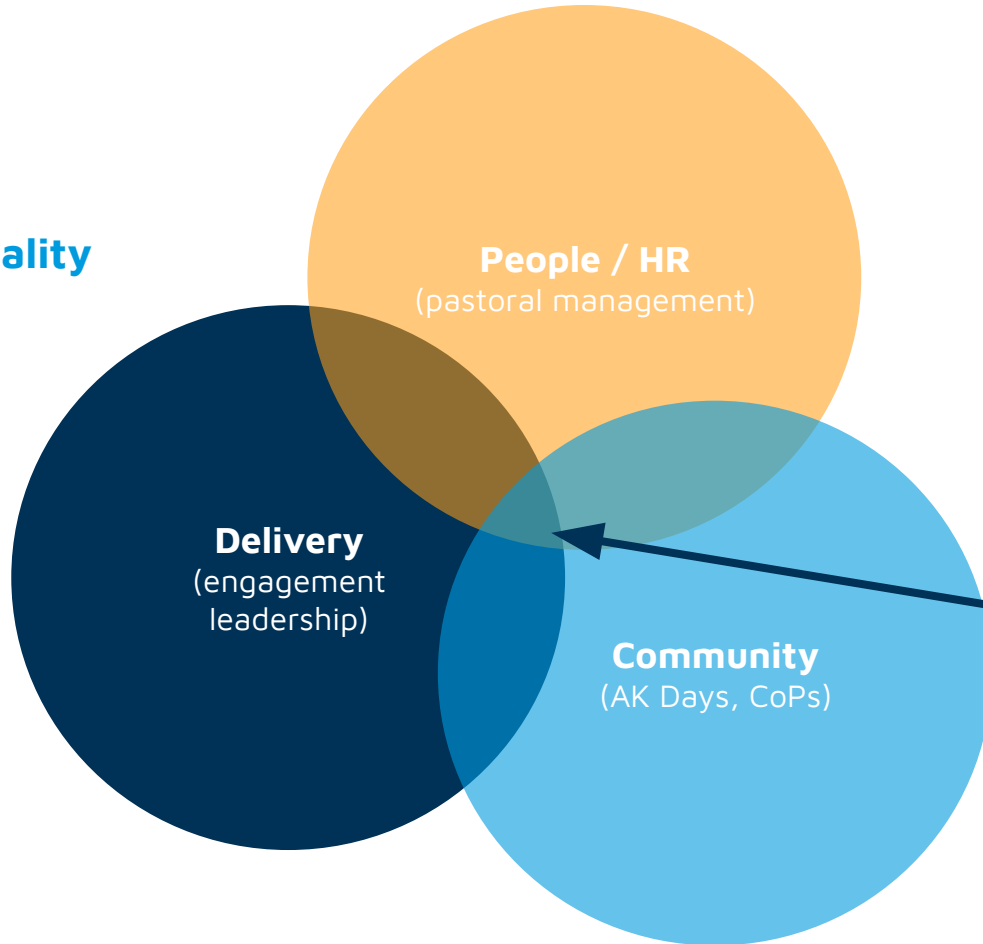

(ethnography)

DevOps?

Cross-functionality

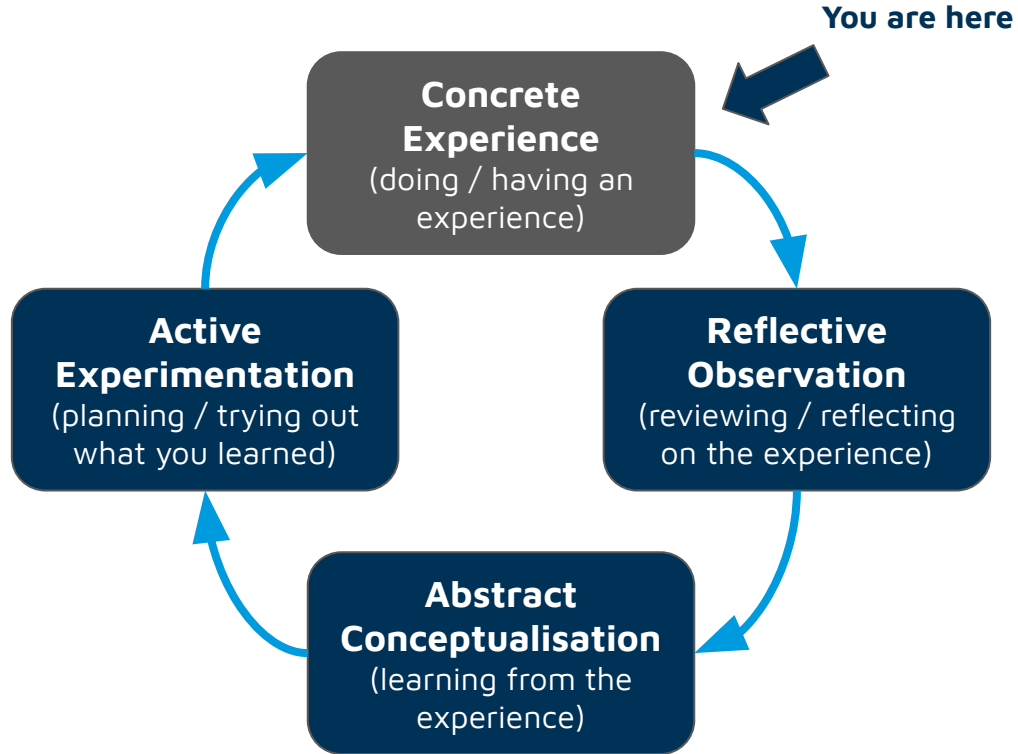

Autonomy

Continuous Learning

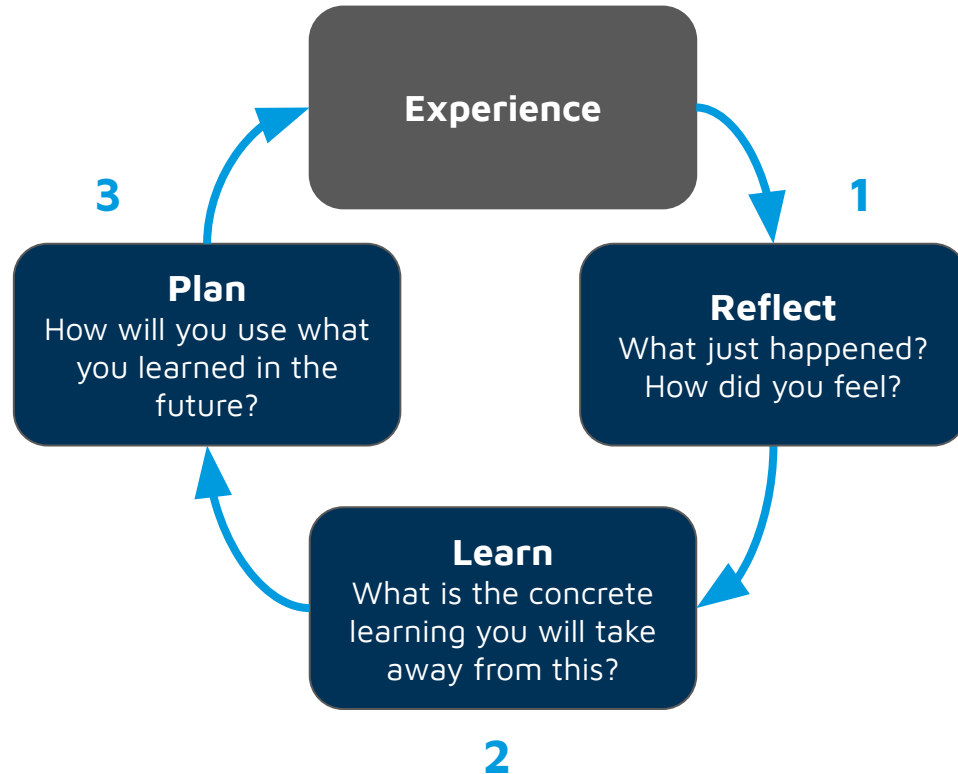

Where we've been...

| We're here to learn... | We'll get there by... | We'll know we're there when... | We'll do it by... |
