Techniques.

Technique: Spread investments across quality stack.

Technique: Establish boundaries.

Before:

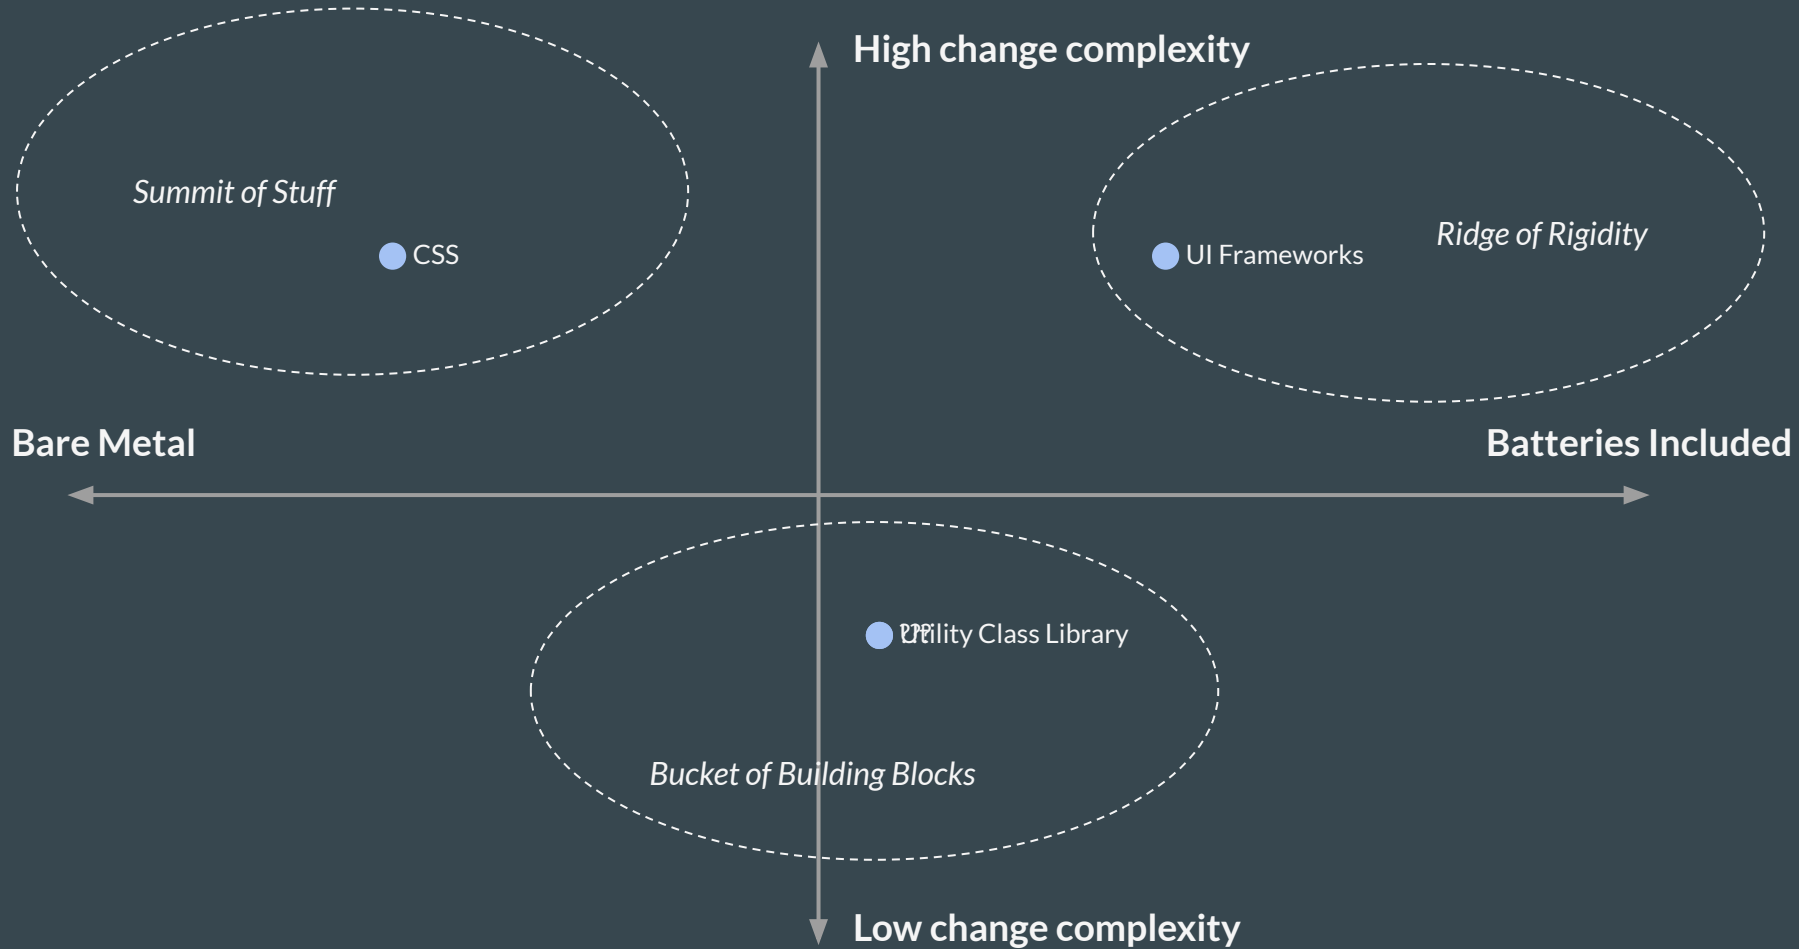

- /app
 - /assets
 - /controllers
 - /helpers
 - /jobs
 - /mailers
 - /models
 - /views

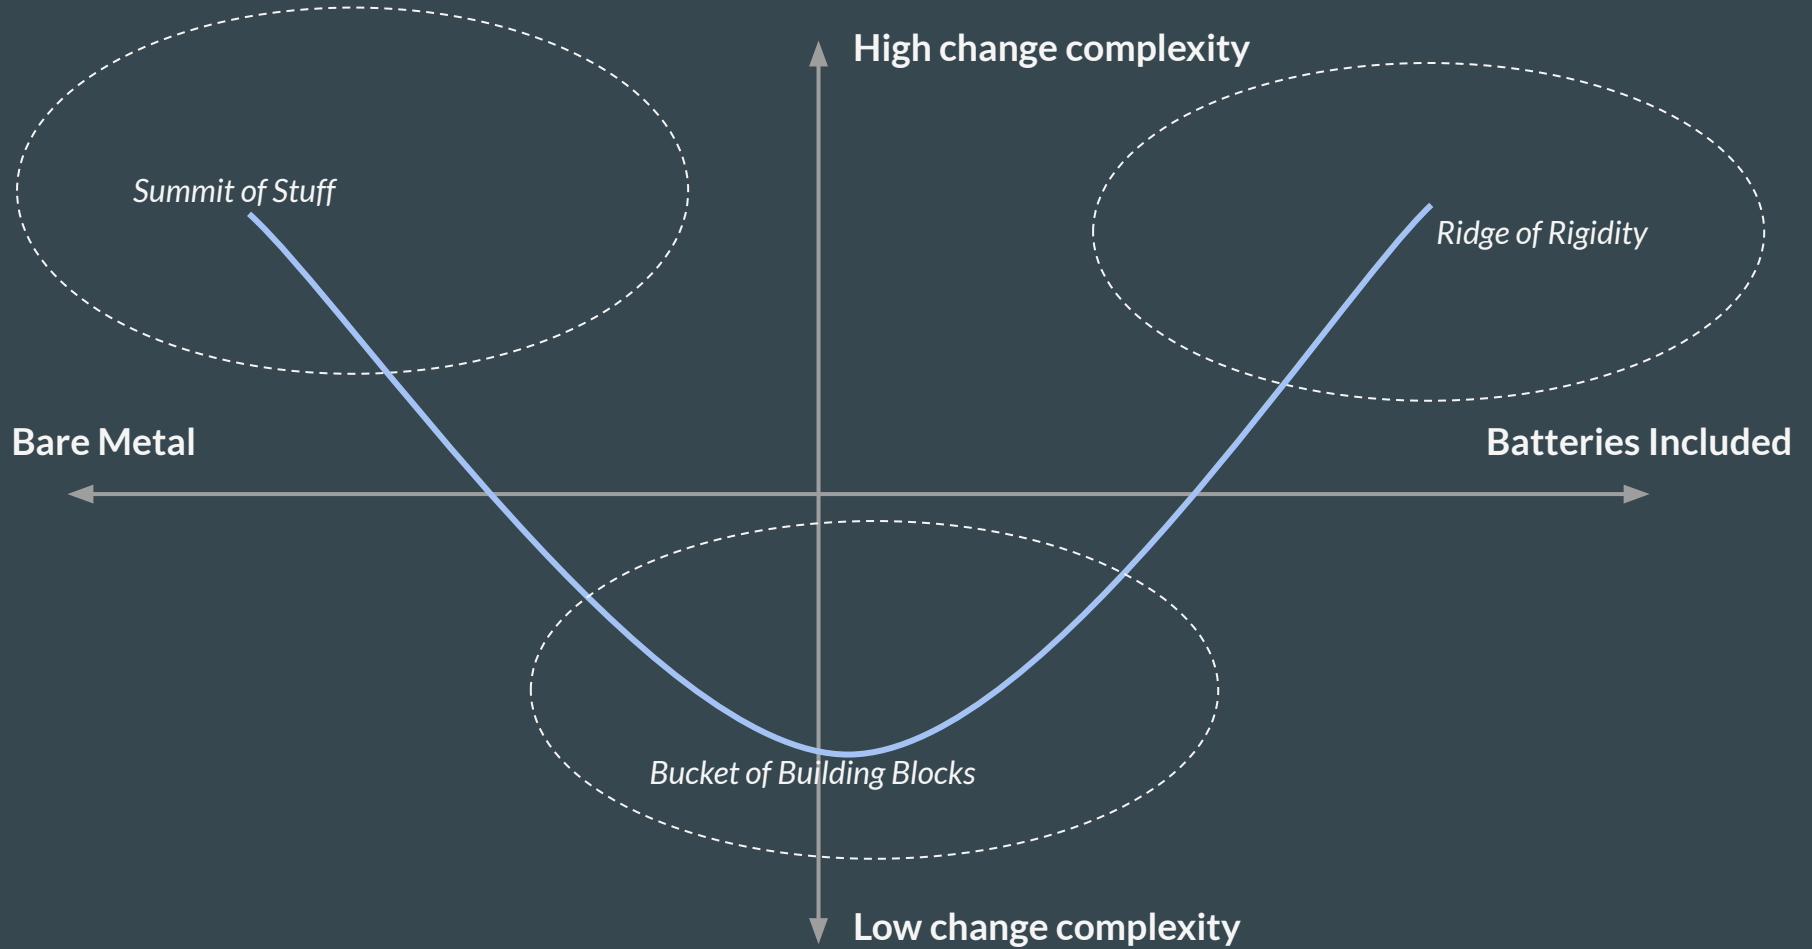

After:

- /app
 - /billing
 - /checkouts
 - /taxes
 - /assets
 - /controllers
 - /helpers
 - /jobs
 - /mailers
 - /models
 - /views

| Technique: Match your appetite for abstraction with your need for change.
