Next week, we
are launching
the 2025
Engineering
Performance
Report

400 of you told us:

- **How you measure and improve the performance of software and systems in the age of AI**

Which observability capabilities are you currently deploying?

Which capabilities
have the potential
to add the most
value to your
day-to-day work?

How would you describe your organization's spending levels on observability?

THE PULSE

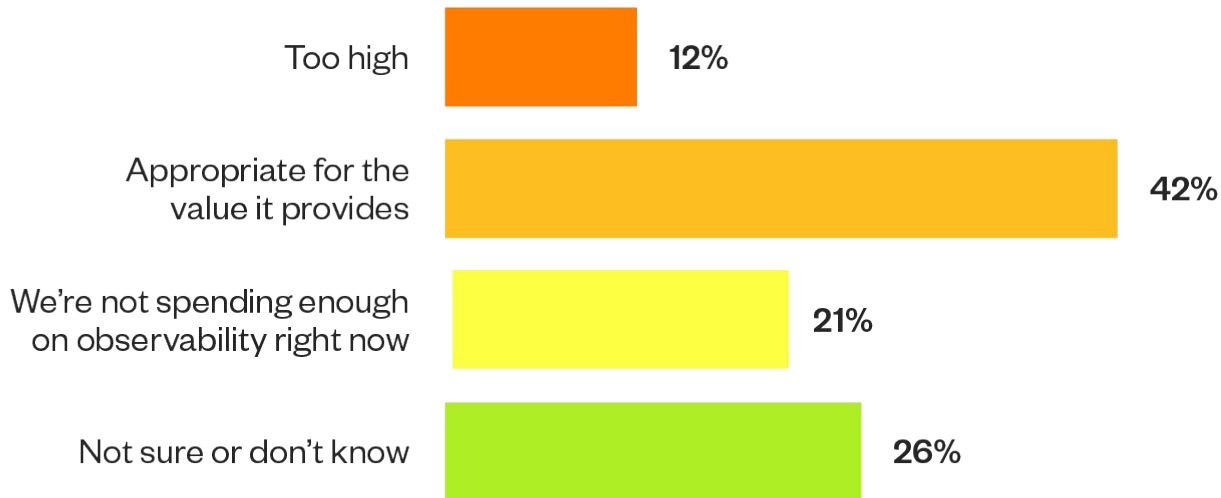

The Pulse #148: Did OpenAI set a new record for Datadog spend?

A reported \$170M per year is almost triple Coinbase's previous record. Also: the largest British automaker learns that outsourcing cybersecurity was a terrible decision, and more
